

## Pricing & Insurance at WWC

Often one of the first questions our new patient coordinators receive is **“what does cost look like?”** A valid question, but often hard to answer as everyone’s care at Wholistic Wellness is custom to their own health goals and needs. That being said, below you will see our typical “Price List” to give you an idea of what cost of care may look like going forward.

**\$100: Initial evaluation and consultation** with one of our nurses, Jessica or Kelsey

**\$250-300: Initial appointment with a Doctor of Chiropractic**

Follow up visits range greatly from \$75-200 and will be discussed at your first visit.

**\$200-250: Initial appointment with a Clinical Nutritionist**

Follow up visits range from \$60-100.

**Additional costs for recommended supplements, lab testing, and technologies as needed.** Again, these costs will be discussed in detail after evaluation at your first visit. All of our providers will do what they can to work with your health budget.

A follow up question is typically **“are your services covered by insurance?”** We are an out-of-network provider, meaning payment is due at time of service, however, we will submit to your insurance company monthly. Anything that is covered by insurance will be directly reimbursed to you. However, it’s easiest to call your insurance company directly and ask what is covered when it comes to chiropractic care. Some companies will cover chiropractic adjustments and neurological rehabilitation. Clinical nutrition visits and supplements are rarely covered by insurance, but HSA/FSA will apply with proper documentation.
